Linear Roadmap to NC Warfare? (My head hurts)

VISION AND PLAN (DOCTRINE)
- Linear, overwhelming force
- Multi-dimensional, emergent capability

FUNCTIONAL/PROCESS ARCHITECTURE
- System Specific
- Across DNS-style COIs

TECHNICAL ARCHITECTURE
- System Engineering
- Reference Model, Reference Arch., Architecture

BUSINESS MODEL
- Acquire a system
- Acquire a network-enabled capability (node)

LEGAL
- Lots of Proprietary Claims
- Mixed IP model

CONTRACTS
- Narrow clauses; no development standards
- Clauses that require open build, run, manage

COMMUNICATION
- Within a program of record
- Across the enterprise

EDUCATION
- Traditional Systems Engineering & PM
- Reformed curricula, model driven development

LOGISTICS
- Logistics train for every POR, repair intensive
- Replace, not repair, with COTS overspares

ORGANIZATION
- ACAT-driven Governance
- FOS, SOSs, COI governance

ENGINEERING
- Systems Engineering
- Enterprise Engineering

(((Ecosystems) Operate) Differently)

Net-Centric Theory is the Impetus

NC Theory

Business Model

Contracts & IP

Logistics
Communication
Enterprise Engineering

Org & Governance

Functional & Tech Arch.

NC Fabric

Morph Educational Curricula

New Business Model *is* the Tipping Point
